1. Purpose of Amendment

Due to unforeseen delays in the procurement process the funding amount and life of project has changed from the original IEE (Asia 16-009). The life of project (LOP) funding increased by \$1,300,000. The LOP AMD is now \$4,300,000. The LOP by 1 year*. The new LOP is now four years. There is no change in the geographic focus or scope of activities.

All approved conditions, limitations and stipulation for revision of the original IEE remain in force for increased LOP amount and duration.

2. Climate Change:

Adaptation/Mitigation Measures: The majority of activities for this program have a categorical exclusion determination. For activities that are determined to impact the environment, the implementing partner (IP) shall conduct climate risk screening and incorporate appropriate measures into an environmental mitigation and monitoring plan as well as seek to incorporate community education in regards to climate change and how to mitigate risks.

*The original IEE LOP was FY16 - FY19 (3 years), but the project has not yet started yet, so this IEE amendment reflects the new start date of FY17 and an end date 4 years later in FY21.
